    run_langgraph_tools_demo()
```

```python
def run_langgraph_tools_demo():
    print("Building LangGraph Pipeline with Tools...")

    # 5. Build the graph
    graph_builder = StateGraph(State)

    # 6. Add nodes
    graph_builder.add_node("chatbot", chatbot)
    graph_builder.add_node("tools", tool_node)

    # 7. Add edges
    # START always goes to chatbot
    graph_builder.add_edge(START, "chatbot")

    # The chatbot node goes to the 'tools' node IF the LLM decided to call a tool.
    # Otherwise, it goes to END. We use the prebuilt `tools_condition` edge.
    graph_builder.add_conditional_edges(
        "chatbot",
```

```
(venv) PS R:\langgraph_project> python tools.py

Welcome to the LangGraph Groq Chatbot with Tools!
Try asking for the weather or doing some math.
Type 'quit' or 'exit' to exit.

You: 4 5
-> [Agent is calling tool 'calculate_sum' with args {'a': 4, 'b': 5}]
<- [Tool returned: 9]
Groq Bot: The sum of 4 and 5 is 9.
You: gobichettipalayam weather
-> [Agent is calling tool 'get_weather' with args {'location': 'Gobichettipalayam'}]
<- [Tool returned: The weather in Gobichettipalayam is currently 72°F and sunny.]
-> [Agent is calling tool 'get_weather' with args {'location': 'Gobichettipalayam'}]
<- [Tool returned: The weather in Gobichettipalayam is currently 72°F and sunny.]
Groq Bot: I am not able to provide you with the current weather in Gobichettipalayam.
You: exit
Goodbye!
```
